Project proposal due Tuesday, March 27

Write a short paragraph describing the plan for your end-of-semester project. Include the topic, the primary references you will use, and what you plan to accomplish in terms of implementing something original.

All choices of topic and implementation plans are subject to the instructor’s approval. Email or talk to me early on with your ideas or preferences for what you’d like to do. In the case of overlapping topics, precedence will be given to the student who first submits a reasonable plan.

Other deliverables and approximate weights in determining grades:

10% Preliminary project description
50% Implementation and demo code
20% Presentation – visuals, slides, oral communication
20% Presentation - content
